

Bandi Meal 9-9-1 + 7% Ca

DRY ORGANIC FISH MEAL FERTILIZER

Concentrated dry fish-based nutrition with nitrogen, phosphorus, and calcium.

PRODUCT OVERVIEW

Bandi Meal is a dry fish meal fertilizer derived from hydrolyzed fish. Its concentrated analysis supplies nitrogen and phosphorus along with calcium, making it a distinctive dry option within the BWF Banducci product line.

KEY BENEFITS

- Provides concentrated nitrogen and phosphorus
- Includes 7% calcium
- Supports vigorous plant growth and structural development
- Dry format offers flexibility for soil fertility programs
- Derived from fish-based material

BEST FIT

Soil fertility programs, crops requiring concentrated dry nutrition, and programs where additional calcium is beneficial.

GUARANTEED ANALYSIS

9-9-1 + 7% Ca
