

Organique Exquis 3-1-1

LIQUID FISH FERTILIZER

Lower-nitrogen fish nutrition for nitrogen-sensitive crops.

PRODUCT OVERVIEW

Organique Exquis 3-1-1 was developed for crops that are sensitive to excessive nitrogen or for programs where a lower nitrogen analysis is preferred. It provides growers with a fish-based fertility option that allows more control over nitrogen input.

KEY BENEFITS

- Provides the lowest nitrogen analysis in the BWF Banducci liquid line
- Designed for nitrogen-sensitive crops
- Allows more precise nitrogen management
- Suitable for soil or foliar application when permitted by the label
- Designed for organic production systems

BEST FIT

Nitrogen-sensitive crops, including grapes, and fertility programs where lower nitrogen is desired.

APPLICATION AND USE

Follow the current product label for exact application rates, dilution, handling, and crop-specific directions.

GUARANTEED ANALYSIS

3-1-1

FORM

Liquid Fish Fertilizer

DERIVED FROM

Fresh pelagic fish, stabilized with sulfuric acid.

ORGANIC STATUS

OMRI Listed. Review the current product certification and label before use.
