

Secure Organics 4-1-1

LIQUID FISH FERTILIZER

A moderate-nitrogen fish fertilizer for crops that do not require a high-nitrogen program.

PRODUCT OVERVIEW

Secure Organics 4-1-1 provides a readily available fish-based nitrogen source with less nitrogen than BWF Banducci's 5-1-1 and 6-1-1 formulations. It gives growers a flexible option for crops or growth stages where a more moderate nitrogen level is preferred.

KEY BENEFITS

- Provides a moderate fish-based nitrogen level
- Supplies organic matter and plant nutrients
- Supports vegetative, bloom, and fruiting stages as part of a balanced program
- Suitable for soil or foliar application when permitted by the label
- Designed for organic production systems

BEST FIT

Crops requiring moderate nitrogen, general fertility programs, and applications where a lower nitrogen analysis is appropriate.

GUARANTEED ANALYSIS

4-1-1

FORM

Liquid Fish Fertilizer

DERIVED FROM

Fish solubles, stabilized with sulfuric acid.

ORGANIC STATUS

OMRI Listed. Review the current product certification and label before use.

APPLICATION AND USE

Follow the current product label for exact application rates, dilution, handling, and crop-specific directions.
